 - Backend and database management for deployed applications

Technologies: Node.js, JavaScript, PHP, Flutter, Dart, MySQL
- Feb 2019, Jul 2019

IT Technician
InfoConnexions

- IT technician services, installation and maintenance of OS and applications, maintenance and assembly of Excel hardware, database management and email managers

PROJECTS

- Oct 2025, Present

AGC Padel Academy — Booking & Payments Platform
Freelance Project

Designed and developed a production-ready booking platform for a sports academy in Switzerland.

 - Time-slot reservation system with persistent data
 - Online payment integration using Stripe API and webhooks
 - Responsive frontend built with React, Vite and Tailwind
 - Backend and database powered by Supabase
 - Architecture prepared for future administrative dashboard features

Result: Live platform used by real users for bookings and payments.
<https://agcpadelacademy.com>
- Apr 2025, Jun 2025

AI Multi-Agent System for Repository Onboarding

Developed an AI multi-agent system designed to analyze software repositories and automate developer onboarding tasks.

 - Automatic repository cloning and dependency installation
 - Codebase analysis and technology detection
 - Workflow orchestration implemented with LangGraph
 - LLM integration using Hugging Face Transformers and Falcon-7B
